

IN THE CLAIMS

Please cancel Claims 1-8, 10-20, 54 and 58-60 without prejudice.

Please enter the following amendments.

67. (Previously Amended) An electrode structure for a display device comprising:
- a) a plurality of first electrodes;
 - b) a resistor layer disposed over said plurality of first electrodes;
 - c) a first dielectric layer comprising a layer of silicon dioxide disposed over said resistor layer;
 - d) a plurality of second electrodes disposed over said dielectric layer;
 - e) a second dielectric layer disposed over said plurality of second electrodes;
 - f) an evaporated molybdenum layer disposed over said second dielectric layer; and
 - g) a sputtered molybdenum layer disposed over said evaporated molybdenum layer.
70. (New Claim) The electrode structure described in Claim 67 wherein said plurality of first electrodes is disposed over a backplate.
71. (New Claim) The electrode structure described in Claim 67 wherein said first electrodes and said second electrodes are formed of an aluminum alloy.
72. (New Claim) The electrode structure described in Claim 67 wherein said second dielectric layer comprises a layer of silicon dioxide.
